Four Brothers from Antioch Now Serve U.S.

Arthur C. Hawkins, Youngest Son of A. M. Hawkins, Called to Army

With the induction this week of Arthur Charles Hawkins into service, Mr. and Mrs. Arthur M. Hawkins, 610 N. Main st., Antioch, now have four sons serving with the U. S. armed forces. Arthur, inducted early this week, was given a seven-day leave, after which he will report for training.

His three brothers now in service are: Sgt. George Hawkins, with bomber group at Tucson, Ariz.; Elmer, with infantry co., Ft. Jackson, S. C.; and Robert, R. R. Det., San Diego, Calif.

Among the 34 men inducted this week from Lake county, eight are from the lakes area, three from Antioch and two from Lake Villa. Boys from this community include:

Edwin E. Blank, Salem, Wis.
Y. W. Carlson, Ingleside
William Henry Rhodes, Lake Villa
George Peter Kennedy, Lake Villa
William Calvin Bledsoe, Ingleside
Arthur Charles Hawkins, Antioch
Frank Edward Kennedy, Antioch
Francis Oliver Hunt, Antioch.

Fourth Defense Mobilization Test Set for May 25

Will Test Warning Signals; Prepare for "Surprise Raid" in July

Emphasizing that Illinois must prepare for around-the-clock bombing, citizens defense corps members of the state's 650 councils of defense outside the Chicago metropolitan area will be roused out of bed at 5:30 a.m. May 25.

Maj. William F. Waugh, chairman of the council's civil protection committee, said they will participate in the fourth of a series of monthly mobilization exercises that will be climaxed in July under air raid and surprise conditions of war.

Corps were put through tests at noon, mid-afternoon, and early evening in February, March and April, respectively.

Women Volunteer

About 100 members of the local civilian defense committee in Antioch township responded when the last communications test was given in daytime April 27. At that time there were 169 members on the committee, but during the month additional names have been added, including some women who volunteered their services as watchers.

Commander Roman Vos of the local committee said today that the committee hopes for an even better showing in the test to be given Sunday morning. All township air raid wardens have been urged to attend the meeting tonight in Legion hall when more details on the defense program will be given by a speaker from the U. S. Army.

Test Signals

The purpose of this month's test, Major Waugh said, will be to test warning signals, improve communications and practice operating techniques.

As in previous exercises there will be no public participation, and traffic will be allowed to continue in a normal manner.

Corps were informed that incidents of a nature involving the use of fire, police and medical services should be previously prepared and given to the air raid wardens to report in regular form.

Major Waugh said considerable attention should be given to the transportation of "casualties" to hospitals or casualty stations.

The test will be of 30 minute duration and corps members will automatically disband upon release by the control center.

Reports from field forces reveal a greater participation each month and increasing efficiency in the handling of simulated incidents.

Has Read News for 50 Years

Richard Wilton of Lake Villa community, who has been a reader of the Antioch News for half a century, called on friends here Monday. Mr. Wilton says he is not a youngster anymore, but his appearance and the way he gets around give no indication of his advanced age. He was 81 last Saturday.

It's A People's War

We are paying more in taxes than ever before . . . and likely will pay more. But we cannot rely on taxes to finance the war. It would not be fair to base a tax on the average single family income when many families have more than one income. We could borrow all the money from the banks, but for both economic and social reasons this is undesirable. The government would then sacrifice its greatest dam against inflation. This is a People's War and the people should finance it. The people WANT to finance it. Sale of War Bonds has mounted consistently since Pearl Harbor.

They give their lives . . . You lend your money.

HOLD MILITARY RITES FOR PETER J. WEBER, WORLD WAR VETERAN

Father of Eight Children Is Buried in Ascension Cemetery Wednesday

Funeral services for Peter J. Weber, veteran of the first world war, were held at St. Peter's church in Antioch at 10 a.m. Wednesday, with the Rev. Father A. N. Thane officiating. Burial was in Ascension cemetery where military rites were given by the Antioch American Legion post of which the deceased was a member.

Critically ill for ten days, Mr. Weber died Sunday morning in Veterans hospital, North Chicago. He had suffered a severe illness a year ago, from which he never fully recovered.

He was born in McHenry county, on Oct. 3, 1891, the son of Mr. and Mrs. Mathias Weber. Following the world war he took up farming and lived in Antioch vicinity for the last ten years. The family home is on the Oetting farm just north of Channel lake.

Surviving are his wife, Elizabeth, and eight children: Arnold, Mrs. Elizabeth Sheehan, Gladys, Irving, Esther, Gerald, Patricia and Robert. There are three grandchildren, Elmer, Donald and Judith Sheehan; also two sisters and two brothers: Mrs. Christina Britz of Spring Grove and Mrs. Mayme Mickelsen, of Chicago; John Weber of Ingleside and Jon Weber of Chicago.

News of the Boys in Service

On Furlough
Clair Elliott, technical corporal, Camp Phillips, Kans., is spending his furlough here with his family. Corp. Elliott was one of the first men called under the selective service act. After several months service he was released under the 28 year age ruling, and 13 month afterwards was again called to service.

—V—

Kenneth C. Hills, chief petty officer, U. S. N., who has been serving for several years in the Caribbean area, has been visiting his parents, Mr. and Mrs. Walter K. Hills, during the past week. Officer Hills, wearing service stripes for eight years active duty with the navy, was accompanied by his wife, who came from her home in Los Angeles, Calif. Hills entered the navy soon after his graduation from Antioch High school, and saw service in many parts of the world before the start of the present war. For many months he was aboard the aircraft carrier Lexington, and also served in the Panama canal area.

A family re-union was held at the Hills home Sunday in honor of Chief and Mrs. Hills. Forty-five relatives from Chicago, Waukegan and Antioch were present.

—V—

Major and Mrs. L. D. Powles of Dayton, Ohio, are visiting friends and relatives here and in Waukegan during the major's leave of absence from duty at Wright Field where he is in charge of the quartermaster corps. Major Powles, one of the youngest veterans of the first world war in this locality, continued his military career after the armistice by enrolling in the reserve officers corps. First lieutenant, he was advanced to the rank of captain soon after reporting for active duty in the air corps at Wright Field. A few months later he was made a major and placed in charge of the quartermaster corps. . . . Before leaving for the air corps Major Powles was a member of the Antioch village board of trustees.

—V—

Norman Edwards, seaman 1st class, Beach Haven, N. J., is among the service men on furlough this week. He is the youngest son of Mr. and Mrs. Bert Edwards of Antioch and is one of the five from that family now in (continued on page 5)

Antioch Boys Commended By Navy and Marine Corps for Action on Guadalcanal

Cunningham and Crandall Under Constant Fire in Establishing Base

How two Antioch boys, Clifford Cunningham and Jack Crandall, and other members of the Sixth Construction Battalion worked "through daily bombings and nightly shellings" to effect the American occupation of Guadalcanal was revealed in communications from Commander J. P. Compton, U. S. N., and A. A. Vandegrift, major general, United States Marine corps. The communications were addressed to the commanding officer of the construction battalion and to Rear Admiral B. Morrell, U. S. N., Washington, D. C.

Cunningham and Crandall, serving with the famous "Seabees," went through the entire campaign with the Marine corps, leaving there after the island was occupied by American troops.

Commander Compton's letter addressed to the Battalion commanding officer follows:

Subject: Appreciation of Services.

1. On the eve of departure of the Sixth Construction Battalion, I wish to express my sincere admiration for this unit, both collectively as a military organization, and singly as individuals.

2. Our service together has been short by the calendar, but long in experience. From the confusion and haste of Mofett Field, you arrived at this base an organized, determined Unit. With no previous experience to call upon, and no forerunners to clear the field, you immediately established yourselves as the backbone of development; and from all sides burdens and problems were thrown at you for settlement. With no equipment except your own bare hands and exceptional ability, plus Japanese scrap, you have performed wonders through daily bombings and nightly shellings, rain, mud, dust and sick-

ness, you have persevered and finished your job.

3. No matter what the future may hold you have done your part; made history. To you all I wish the best of luck, and to the Battalion: More Fame and Glory.

J. P. COMPTON.

Major General Vandegrift's letter to Rear Admiral Morrell:

My Dear Admiral:

"I wish to express at this time my appreciation for the work done by the Sixth Naval Construction Battalion at Guadalcanal. They were a splendid body of workmen who approached and successfully performed an unusual variety of tasks. Each of those tasks was intimately connected with the preparation of and maintenance of Guadalcanal as a base. The members of the Battalion with courage and willingness undertook construction work of all types; and when the demand arose, they cheerfully turned to other tasks where hands were needed. During one period the pressure of enemy forces against us was so great that troops could not be spared to handle stores on the beaches. Fighting had to go on and ships had to be unloaded. Construction workers voluntarily took over that work and performed it exceedingly well.

"In addition to commenting upon the performance of duty by the "Seabees," I wish to commend the wisdom that foresaw the need for such an organization. In the war in the Pacific in seizing one base after another, few of us realized the great amount of construction which would be necessary. Need for this arises almost immediately after the initial landing, and becomes greater as the area seized is developed into a real base. I do not know how we would have gotten along without the "Seabees," and trust that they will be participants in every future operation in even larger numbers than at Guadalcanal."

A. A. VANDERGRIFT
Major General, USMC

IN SPITE OF THE STORM

Waste of Paper Is Out for the Duration of War

Subscription Price of News to Be \$2 after July 1;
No Free Copies

Few business enterprises have suffered from government regulations, wartime shortages, postal restrictions, taxes, and lack of skilled workmen as has the publishing business. No other business, with the possible exception of banks, has been called upon to render a comparable free service to the government in its all out war effort.

Time was, in peace time, when little attention was given to over-due subscriptions, and newspapers were given freely to business and professional firms who periodically were users of advertising space, and thus were entitled to checking copies of issues in which their advertising appeared.

Country at War

Now, the country is at war, and the Antioch News along with every other business, is faced with the necessity of conforming to the many wartime restrictions and must cut all unnecessary costs. The government asks, and receives, thousands of inches of space in newspapers for publicizing war bond drives, salvage campaigns, Red Cross, Army and Navy recruiting, U. S. O., civilian defense, rationing programs, and many other wartime activities. Besides this service, which the News is glad to render free, the paper is being sent to hundreds of service men, many of whom are overseas, and they come first on the News subscription list. In this, the Antioch American Legion Post co-operates.

Service Men Come First

In order to be of most service to the men who are serving our country, and to make the most efficient contribution to the country's war effort, the News must discontinue all forms of gratuity to civilians.

All complimentary copies now being sent to former advertisers who are not at this time using advertising space, and copies to persons whose subscriptions are long overdues must be discontinued. Service men come first.

All subscriptions should be paid in advance, and all arrearages must be brought up to date. Waste of paper is out for the duration.

On July 1, 1943, the subscription price of the Antioch News will be \$2.00 a year instead of the \$1.50 rate now in effect. Until July 1 subscriptions, both new and renewal, will be accepted at the \$1.50 rate, and the subscriber may pay from one to five years in advance at that rate.

RATIONING TIMETABLE

May 21
Coupon No. 5 in basic "A" book for gasoline expires.

May 23
Red J stamps become valid through May 31

May 30
Coffee stamp No. 23 expires

May 31
Sugar coupon 12, good for five pounds, expires. Blue G, H, and J food stamps and red stamps E through J expire.

June 15
Last valid date for stamp No. 17, good for 1 pair of shoes.

June 30
Last day for second periodic inspection of passenger car tires for "B" card holders.

Sept. 30
Expiration date for Period 5 fuel oil coupons; last day for second periodic inspection of passenger car tires for "A" card holders and motorcycles.

Ration Book No. 3
Rationing boards throughout the Chicago area are preparing to receive applications for ration book 3 in a ten day period starting June 1.

Each blank includes a serially numbered stub to be retained by the person filing a blank; the formal application; and a section for listing the names of all persons for whom books are sought by the head of a family. The last two sections are to be mailed between June 1 and 10 by applicants to the OPA mailing center. Each card must bear a postage stamp.

Every person who now holds a war ration book No. 2 is entitled to one of the new books, whose stamps bear pictures of aircraft, tanks, machine guns and other implements of war. Thus far the OPA has indicated that book No. 3 will be used to replace book No. 2 when the latter's stamps are exhausted.

Those who have old radios, or parts of radios, are asked to communicate with Mr. Banedt, Antioch 158-M-1, or with Commander Roman Vos of the defense committee, Antioch 131-J.

The radio system, if brought to realization, will be another step forward by Antioch Township Civilian Defense, which has long been regarded as a model working organization.

Short-Wave Radio May Aid Township Civilian Defense

Wm. R. Banedt Working on Plan for Rapid Communication

A system of short-wave radio as an aid to rapid communication may be brought into use in Antioch township, according to plans now being considered by the local civilian defense committee, it was revealed this week by William R. Banedt, head of the Victor Lubricator Sales company of Lake Catherine.

Banedt has been active with the local defense committee since its organization. Early last fall he attended the UBX (unexploded bomb) school at Peoria, later serving as instructor in this branch of defense work in the local school for fire wardens.

Banedt, who has obtained sanction of the local committee on defense for the installation of such a system, says all that is needed to put the plan into operation is some spare parts of old radios, and the sanction of the wave-length by the Federal Communications commission. Banedt, a radio technician, says that quite efficient sets, both receivers and transmitters, may be built from parts of old radios that are now regarded as useless by their owners.

The local system would embrace several receivers located at strategic points, a centrally located transmitter which can be adjusted to police radio frequency as well as to the local wave length. The system would also include a number of mobile units which would be carried in air raid warden patrol cars.

Those who have old radios, or parts of radios, are asked to communicate with Mr. Banedt, Antioch 158-M-1, or with Commander Roman Vos of the defense committee, Antioch 131-J.

The radio system, if brought to realization, will be another step forward by Antioch Township Civilian Defense, which has long been regarded as a model working organization.

CLAIMS POLITICS COSTS MAGAZINES • MAILING RIGHTS

Senator William Langer of North Dakota said last week in the United States senate that scores of magazines have been denied second class mailing privileges by Postmaster General Frank Walker, who, he said, "is drunk with power and will tolerate no opposition."

Langer charged that Walker, who is chairman of the Democratic national committee, barred many of the magazines from the mail because of political reasons.

"I say there is no possibility of free expression in this country today—not while Frank Walker holds publishers like puppeteers in one hand and threateningly wields the club of revocation of privileges and political censorship in the other," Langer said.

Mr. Nels Petersen and baby daughter, Alice Elaine, returned home from Victory Memorial hospital, Waukegan, Saturday.

Poppies in tribute to America's battle dead of two wars will be worn in Antioch on Saturday, May 29, Mrs. T. E. Burnette, president of Antioch Unit of the American Legion Auxiliary announced today.

The poppies this year will honor the men who have given their lives in the present conflict, as well as those who fell among the poppies of France and Belgium twenty-five years ago, she said. The money contributed for the flowers will be used for the welfare of victims of both wars and their families.

The Antioch Unit of the Auxiliary is making extensive preparations for the observance of

Four More Years?
The New Deal, in its present campaign for a Fourth Term, apparently is trying to isolate the President from the faults of his administration in OPA, foodstuffs, and the handling of the labor question.

The President, himself, returning from a country-wide tour, reported that the nation as a whole is far ahead of Washington in morale and war spirit. Washington, he said, is lagging in war spirit and understanding of what is necessary to win the war.

In other words he aligns himself with the people and against his own brood. It is like a mother trying to avoid criticism for the bad-raising of her children by siding with the truant officer.

Four more years of the New Deal is not just four more years of Roosevelt, however. As Senator Styles Bridges, of New Hampshire, said recently, "Four more years of Roosevelt means four more years of Harry Hopkins, with his spend and spend tax and tax, and elect and elect policies operated from within the White House itself. It means four more years of Government by lame ducks . . . four years more of New Deal wasters spending recklessly . . . four more years of planned agricultural mismanagement which has reduced America for the first time to hunger levels; four more years of crucifying small business, and, above all, four years of WPA over the world at the expense of the American taxpayer."

The Farmer's Wife

Southwest farmers, hiring laborers imported from Mexico, have even been told by the Farm Security

Administration what to feed them.

According to the FSA instructions, "butter is to be served at each meal. Bacon squares or meat in some form for breakfast six times per week and ham one time per week. Eggs should be served every morning, and no limit placed on the number consumed. . . . Always give sweet potatoes at dinner and supper when they are reasonable since the Mexicans like them. Serve cooked cereal only, not corn flakes. Usually try to have only corn bread at dinner; biscuits and white bread at supper. Sometimes white bread is required at dinner and supper as well. In the summer, iced tea or root beer should be served."

This is the first time, to our knowledge, the United States Government has told the farmer's wife what to cook.

Any farmer knows enough to change horses when one gets sway-backed.

A Democrat is a voter who has discovered that the New Dealers aren't.

Well, maybe Leon Henderson isn't a great man. But he can always tell his grandchildren that he was able to get America's living so scrambled in one year that it will take the whole Republican party to untangle the damage.

Tribute to the New Deal—Never before have so many done so little for so much.

President of the United Nations of the World would be quite a title at that. But we wonder how Britain, China and Russia would take to Harry Hopkins as chief of the inner-palace guard?

Maybe what John L. Lewis really wants is for President Roosevelt to give back the \$500,000 that Lewis gave him for the 1936 campaign.

TREVOR

The school children and their teacher, Mrs. Eunice Loth, attended the field meet at Fox River Park on Friday.

Mr. and Mrs. Willard Schneider are moving their household goods from the Mrs. Jessie Allen home to the home of their parents, Mr. and Mrs. Richard Allner in Antioch, where Mrs. Schneider will make her home. Mr. Schneider has enlisted in the navy and expects to leave soon.

Mrs. Jessie Allen and daughter, Priscilla, of Kenosha, spent over the weekend at the Champ Parham home. Her daughter, Elaine Allen, of Camp Lake, spent Saturday with them.

Mr. and Mrs. Henry Ernie Chicago, and sister, Rose, spent the weekend at their cottage in Trevor.

Mr. and Mrs. William Galhart, Salem, were Saturday evening visitors at the home of their daughter and husband, Mr. and Mrs. Lee Wilson.

Mr. and Mrs. James Walsh have returned to their home at Rock Lake after spending the winter months at Hot Springs, Ark.

Charles Oetting was a business caller in Kenosha Wednesday.

Mrs. John Barnett is spending a few days this week with relatives and friends in Chicago.

Mr. and Mrs. Richard Corrin, Silver Lake, were Trevor callers Thursday.

Mr. and Mrs. Alfred Dahl have received word from their son, John V. Dahl, Camp Sibert, Ala., that he has become a corporal.

Mr. and Mrs. Charley Runyard, Volo, Ill., and Mrs. Edna Cable of Lake Villa visited at the Daniel Longman home Wednesday.

Mr. and Mrs. A. J. Baethke accom-

panied their son and wife, Mr. and Mrs. Walter Baethke to Elmhurst, Ill., Sunday to visit the former's brother, William Baethke, who is ill.

Weekend and over Sunday visitors of Mr. and Mrs. Charles Oetting were their daughter, Mrs. Arthur May, Madison, Mrs. Howard Mathews and sons, Charles and Douglas of Riverside, Ill., Mr. and Mrs. Karl Oetting and son, Chesley, Chicago, and Fritz Oetting, Richmond.

Mr. and Mrs. Harry Parks, Chicago, called on friends in Trevor Sunday.

Mrs. Arthur Bushing visited Miss Sarah Patrick and Mrs. Estelle May Friday. On Sunday Mrs. George Brown of Bristol called on them.

Sunday visitors of Mr. and Mrs. Allen Copper were her sister, Miss Frances Hoot, and friend, Fred Berger of Grayslake, Ill.

Word has been received by Mr. and Mrs. Charles Oetting that their son, Pvt. Louis Oetting, has been promoted to corporal at Camp Stewart, Georgia, recently.

Mr. and Mrs. William Kruckman spent Sunday afternoon at their farm home near Wilmette.

Pvt. Edward C. Dunford, 48th Repair Squadron, Kelly Field, San Antonio, Texas, is home on a few days furlough with his parents, Mr. and Mrs. George Dunford, and sister, Mrs. Harry Dexter, Jr.

Mr. and Mrs. Champ Parham are moving from the Harold Mickle cottage into the McKay house which they recently purchased.

Accompanied Sir Walter Raleigh Newport, on the Gaspe peninsula, Province of Quebec, was so named by American Loyalists there in honor of Newport, the navigator who accompanied Sir Walter Raleigh to America.

OUR DEMOCRACY — by Mat

WHEN ALEXANDER HAMILTON WAS MADE FIRST SECRETARY OF THE TREASURY BY PRESIDENT WASHINGTON, OUR GOVERNMENT HAD NO MONEY. HAMILTON OBTAINED CREDIT, ESTABLISHED THE DOLLAR AND DECIMAL SYSTEM OF COINAGE, PAID OFF FOREIGN DEBTS, PUT THE COUNTRY ON A SOUND FINANCIAL FOOTING.

EACH ONE OF US HAS A PERSONAL STAKE IN THE STRENGTH AND CREDIT OF OUR NATION... EACH ONE CAN HELP WIN THE WAR, — DIRECTLY, AS WE BUY WAR BONDS AND INDIRECTLY, THROUGH THE WAR BOND INVESTMENTS OF OUR SAVINGS ACCOUNTS AND LIFE INSURANCE.

SALEM

Mrs. Frank Schmidt and Mrs. Henry Frauthe are spending some time visiting relatives in Milwaukee. Mrs. Natalie Stroope and Mrs. A. C. Stoxen were Woodstock shoppers Monday.

Miss Anita Piper and mother of Sharon spent Sunday afternoon with Mrs. Bertha Mooney.

Mr. and Mrs. Homer Payne attended the funeral of Mr. Payne's father, John Payne, at Zion, Ill., Thursday. Mr. and Mrs. Alex Bailey of La Grange, Ill., and Milton Patrick were dinner guests of Mr. and Mrs. Byron Sunday.

Mrs. Clarence King went to Chicago Friday where she visited her son, Mr. Harold Vandenberg, who stopped off on his way from Canada to California where he is in training. Mr. and Mrs. William Kruckman spent Tuesday afternoon with Mrs. Byron Sunday.

HINTS FROM PUBLIC SERVICE ON THE USE OF YOUR ELECTRIC WASHER

"Ready for the rag bag!
...Oh no, not us"

Sure we've been around a long time and have seen a lot of service. But we're a long way from the rag bag. We're still in good condition and our appearance is as neat as ever.

Of course all the credit goes to the lady of the house for washing us frequently and gently. She discovered long ago that when a garment gets extra dirty it requires hard rubbing and soaking which causes wear and fraying.

What's more, she knows how to wash clothes and how to use her electric washer for best results. What's the secret? None whatever. If you'd like to know how to get better results on wash day and how to conserve your family's washable clothes, we'll be glad to show you.

Where to start—Separate the fast from the unfast colors. To test new clothes, hold the end of the cloth in lukewarm, soapy water for a few minutes. If the water colors, cloth is "unfast."

Run warm water into the tub of washer, but do not fill to water line. The water should only reach the water line after a load of clothes has been placed in the tub. Turn on the washer and pour in the soap until you have about 3 inches of suds.

Put white, slightly soiled clothes in first while the agitator is running. If clothes fail to turn over regularly, there are too many pieces. Washing time—about 7 minutes. If washed too long dirt and suds are re-deposited in the fabric.

In wringing, spread clothes out for uniform pressure on all parts of each article. Don't have the rolls too tight. For large pieces, like bedspreads and blankets, the pressure should be greatly reduced. In some washers this is done automatically.

The color-fast—After soaking the color-fast cottons and linens for 5 to 20 minutes to loosen the dirt, use fresh, lukewarm suds to wash them. The first rinse should be lukewarm, and the following rinses slightly cooler.

Slightly unfast—The washer can be used for clothes with slightly unfast colors. But you must not soak them. Use only lukewarm suds and wash quickly. Clothes with unfast colors should be washed individually by hand.

Merrily has gone to war—don't waste it!

**A Lecture
on
Christian Science**
Entitled
**Christian Science: A Message
of Freedom and Dominion**

by
V. Winn, C. S. B.
Iena, California
Board of Lectureship of
The First Church of
Christ, Scientist, Boston, Massachusetts.

The human race's a greater sense of it endeavor is im- desire to overcome that which brings freedom and liberation. The human race, on its upward march, has instinctively re- belled against anything that would try to take away its religious, political, or economic liberty. This righteous aspiration for freedom is not a mere human hope, but has its basis in divine Truth. In the very beginning of the Bible we learn that "God created the heaven and the earth." We further learn that God said, "Let us make man in our image, after our likeness; and let them have dominion." "Dominion" means "sovereign power"; then man's freedom is a part of the divine order of things—God-bestowed and God-established. In our own immortal Declaration of Independence, that charter of American liberty, we read that God has endowed man with inalienable rights, among which are "life, liberty, and the pursuit of happiness." Freedom, then, is man's natural status, bestowed on him by his creator.

Christ Jesus Brought Freedom

In looking back upon the lives of those who have been the greatest benefactors of our race, there is one who stands out above them all—our great Master, Jesus the Christ. He possessed and demonstrated a greater measure of freedom than anyone who has ever lived. He overcame and destroyed every form of bondage that flesh is heir to. He completely annulled the seeming fetters of sin, poverty, heredity, disease, discord, and even triumphed over death itself. It made no difference whether he was in a raging storm, whether he was confronted by an angry mob, seeming lack, contagious disease, or imminent death; he experienced complete immunity and freedom from evil. False theory has taught us that he was endowed with some supernatural power which made this possible, but the Biblical record and secular history completely refute this. The Scriptures contain unfailing proofs that many others besides Jesus availed themselves of divine power and thus attained their freedom from adverse conditions. In Gibbon's history of the Roman Empire it is recorded that this spiritual power was utilized for three hundred years after the ascension of Jesus. It was only after corruption and materiality had crept into the early Christian church that this healing power seemed to be lost and to become dormant.

Discovery of Christian Science

Finally, in 1866, after the conclusion of a great struggle in America for human rights and liberty, there came to a gentle New England woman, Mary Baker Eddy, a divine revelation that won her freedom from the results of a serious accident and impending death. Having gained her own liberation, she set about to discover the divine law that had healed her. Through prayer, earnest seeking, and a diligent study of the Scriptures, she found that her healing was not miraculous but was in perfect accord with God's will and the divine law. The results of her labors are most beautifully and clearly set forth in the Christian Science textbook, "Science and Health with Key to the Scriptures," where she writes (p. 220): "The voice of God in behalf of the African slave was still echoing in our land, when the voice of the herald of this new crusade sounded the keynote of universal freedom, asking a fuller acknowledgment of the rights of man as a Son of God, demanding that the fetters of sin, sickness, and death be stricken from the human mind and that its freedom be won, not through human warfare, not with bayonet and blood, but through Christ's divine Science." We know that Science is divine knowledge or demonstrable Truth. Then that which frees us, unfetters us, and redeems us is an understanding of that which is true, real, and actual. All bondage comes from ignorance or false belief, and that which frees us is spiritual enlightenment and demonstrable perception of divine facts. Jesus, our Way-shower, pointed out the way of true salvation in that majestic statement, "If ye continue in my word, ye shall know the truth, and the truth shall make you free," and in the Christian Science textbook we have this beautiful correlative (p. 300): "It is our ignorance of God, the divine Principle, which produces apparent discord, and the right understanding of Him restores harmony."

God Is Good

What, then, is this right understanding of God that makes us free, restores harmony, heals disease, and reveals life eternal? One of the first things that we learn in Christian Science about God is that He is wholly, entirely, and completely good. The Psalmist declared, "Thou art good, and doest good." Again he declares, "O taste and see that the Lord is good; blessed is the man that trusteth in him." In strict accord with this scientific definition of God, Christian Science declares (Miscellaneous Writings, p. 26), "The Scriptures name God as good, and the Saxon term for God is also good. From this premise comes the logical conclusion that God is naturally and divinely infinite good." The fact of the goodness of God at once utterly destroys one of the chief sources of mortal man's enslavement, namely, duality, or a belief in the reality and existence of both good and evil. The cardinal point of Christian Science is that God is infinite good; that He creates only good, knows only good,

promotes good, and that His creation is primarily and unalterably good. Then God's handiwork expresses good, reflects good, and manifests good. There is nothing wrong or ungodlike in or of God's creation.

God's Power Is Good

The ever-availability of good at once destroys quickly and utterly the fears of the human mind, and brings freedom. It has been found and proved in Christian Science practice that much of the fear of bondage to evil spring from the belief that man lives in a creation where both good and evil operate; that he is subject to two powers, one of which is benevolent and kind, and another which is afflictive and harmful; that at one time he is controlled by that which is right, and at other times by that which is wrong. Christian Science, the Science of infinite good, repudiates and disproves these wrong assumptions, and then the fear resulting from these false and erroneous theories is annihilated. God made man in His own likeness, and man is a part of God's creation. God governs His own creation, and hence governs man. There is only one way that God could govern His creation, including man, and that is in a just, true, and right way. In the realm of infinite reality there is nothing to fear, to induce fear or support fear. There is nothing there to frighten man or interfere with his freedom, harmony, peace, or joy. There is no power contrary to good that can enslave man. The Psalmist declared, "I will walk at liberty: for I seek thy precepts." The precepts of God show us that His power is operating for the good of all that He has made, and as we walk in the light of this truth, fear departs, and His peace is continually with us.

True Selfhood

Nothing is more conducive to liberty than a true sense of individuality. God is infinite good, and as we discern this divine verity we see clearly than man's true selfhood must express goodness, righteousness, and virtue. In the Scriptures we learn, "The righteous shall inherit the land, and dwell therein for ever." The word "right" means "that which is true, faultless, genuine, real, or actual." The real man can inherit only that which comes from his Father-Mother God. The man of God's creating, the "Son of the Highest," inherits the wealth of Love, the goodness of good, the harmony of Soul, the glory of Mind. When we have rightfully and lawfully received an inheritance, the law protects us in our enjoyment of it. Of this genuine man the Bible declares, "Thou madest him to have dominion over the works of thy hands; thou hast put all things under his feet." This dominion is a constituent part of man's inheritance, and can never be taken away. He cannot be separated from it, for it is forever associated with his true identity. In our human relationships we naturally try to associate with the very highest and best—with those who express noble qualities and high ideals. As we identify ourselves with the real man, the man of God's creating, the spiritually good and real are manifested in us and through us; we associate ourselves with them.

True Concept Brings Freedom

Something happens in human experience that an innocent person is wrongfully accused. We learn in Christian Science that man's real self is the reflection of God's goodness. To identify ourselves with any other concept of man is always a case of mistaken identity. To accept as real a mortal concept of man brings bondage and restriction. To acknowledge only the divine concept brings freedom and liberation. To believe in a mortal, material concept of man fetters and limits us. The textbook of Christian Science tells us that "the fetters of man's finite capacity are forged by the illusion that he lives in body instead of in Soul, in matter instead of in Spirit" (Science and Health, p. 223). When we live in a certain community we are necessarily subject to the laws of that community. As we perceive our true selfhood, we see that man lives in good, dwells in the kingdom of good, and is subject only to the laws of good. The fetters of evil drop away, for we are no longer in the domain of error, but we are in the jurisdiction of God, where freedom is the rightful and normal condition of man.

Liberation through Right Thinking

Christian Science declares and proves that true freedom is the inevitable result of right knowing. The results of this right knowing are beautifully set forth in the Scriptures when they declare that "the creature itself also shall be delivered from the bondage of corruption into the glorious liberty of the children of God." "To deliver" means "to set free from restraint; to set at liberty." In the passage quoted from the Christian Science textbook, showing us how our freedom is won, we learn that the fetters of sin, sickness, and death must be stricken from the human mind. When they are stricken from the human mind and are replaced and dispelled by the divine facts of the divine Mind, they disappear from human experience. All that ever restricts man's enjoyment of the fullness of health and harmony, all that seems to produce suffering, is some theory, false belief, or erroneous concept which the Science of right thinking or knowledge of Truth destroys. "Ye shall know the truth, and the truth shall make you free," not in a far-off future, but here and now.

A Christian Scientist was at one time severely injured as the result of a fall. In such cases medical belief says that one cannot walk for about three months. Through the understanding of God's law, the law of good, the law of harmony, God's eternal law of right, he was healed, and was able to take up his usual duties in about three days. Man's freedom and divine rights are at hand to enjoy and utilize. Any failure to realize them is due to our failure to accept and appropriate them. The supreme power of the universe is infinite, divine Mind, and man's divine heritage is to manifest divine Mind. When we have a clear title to a piece of property it is known as a "freehold." Man is a

freeholder; he is a freeman; he has a clear title to all that is good, right, and true. If one enters unlawfully upon the property of a freeholder, he is known as a trespasser, and can be properly ejected. Anything evil, any false belief, erroneous concept, or spurious law that would attempt to restrict our full enjoyment of good is a trespasser, an intruder, or interloper.

God Is Divine Principle

The understanding of God as Principle is a source of freedom, dominion, and power. What think of "principle" as that which is basic, foundational, causative, reliable, and unchanging. A dictionary definition of "principle" is "source or origin; that from which anything proceeds." In John's Gospel we read that "all things were made by him; and without him was not any thing made that was made." Then God is the one divine Principle, basic cause, author, and maker of all that is real, right, or true. The activity of Principle always brings freedom, liberation, and concord. Ignorance of the science of mathematics brings discord. An understanding and application of its rules brings harmony. A principle promotes the right and is opposed to that which is wrong. Anything unrighteous is unprincipled, lawless, baseless, and unreal. Anything that ensnares or engenders bondage to evil is unprincipled, for it is contrary to God's plan, loving purpose, and gracious rule. Sin is unprincipled because its tendency is to bind one who indulges in it. Disease is unprincipled, because it hampers and interferes with normal, right, and harmonious activity. Death is unprincipled for it deprives one of his rightful enjoyment of abundant, divine, and unfettered life. Jesus came that we might have life, and have it more abundantly. God's creation abides in the fullness of His love, and of His infinite goodness we can freely partake.

One Principle

We have a friend who was healed of tuberculosis in its last stages, in a little over two weeks' time. Another friend was healed of Bright's disease through the earnest study of the Christian Science textbook. If these diseases had been in accordance with Principle and divine law, could they have been healed? Jesus' mission was not to destroy the law, but to fulfill the law. In fulfilling that law of God, the law of good, he destroyed sin, disease, discord, death, and brought freedom and liberation to suffering humanity. God is the supreme power of the universe, and man is His image and likeness—His reflection or expression. The man of God's creation reflects divine power. He expresses the full dominion of Principle. He is untrammeled and unrestrained by disease or any other false, adverse, limiting beliefs of error or evil. There is only one principle of any true science—never two. In music we do not have two principles, one that produces discord and another that produces harmony. There is only one, and that one brings about concert and harmony; any seeming discord is at variance with its principle and rules. There is nothing in God's kingdom to enthrall man or hinder his enjoyment of freedom and dominion. How beautifully the hymn expresses it!

God made all His creatures free;

Life itself is liberty;

God ordained no other bands

Than united hearts and hands.

So shall all our slavery cease,

All God's children dwell in peace,

And the newborn earth record

Love, and Love alone, is Lord.

(Christian Science

Hymnal No. 83.)

When the Science of divine good is understood, this glorious truth is fulfilled in our lives.

Truth Destroys Jealousy

As we understand more and more the facts of being, the alness, the oneness, the supremacy of good, we attain our freedom from one of the most enslaving traits of the carnal mind, namely, jealousy. Good is boundless and unlimited, and all of good is available to man. He giveth us richly all things to enjoy" is the Scriptural promise. The whole of good is man's to enjoy and reflect. True living is not a material, organic, or fleshly experience, but is a process of true thinking and spiritual knowing. The only enjoyment of good is the consciousness of good. As we perceive and become conscious of the God which another is expressing, we are enjoying that same good. The greater our appreciation of good, no matter who expresses it, the more of good comes into our own experience. "What thou seest, that thou beest," wrote a classic writer, and as we see the fullness of good we know that it is for everyone to appropriate and enjoy.

What is it that seems to cause jealousy but the belief that someone has some form of good that is unavailable to us? Good is everywhere, so man is in its divine presence. All creation is in that divine presence. Each one is divinely equipped to see that ever-present good, and his vision of it never interferes with another's view of it. Any form of good that is available to anyone is available to everyone. When we realize this great fact we are not envious of our brother's good, but constantly rejoice in universal good. We are not only happy that he has it, but that everyone has it. Let us suppose that one had a very keen sense of beauty and a highly developed appreciation of that which is lovely and fair. One of his favorite diversions would be to go to a beautiful art gallery and study the paintings that were there, in all their loveliness and grandeur. At times he might go alone, and at other times he would take a group of his friends along. On such occasions he would point out to his friends the beauty and grace that he had perceived through his study and contemplation. His own enjoyment would not be curtailed but greatly enhanced by his gracious sharing with his friends of his own vision of beauty and loveliness. He who shares good receives good. He knows the freedom of good, the dominion of good, the buoyancy of good. God's blessings are not confined, but are infinite—to be equally shared and enjoyed by all.

Mortal Experience a Dream

God made man and gave him dominion over all the earth. This is the only man that God made. The Scriptures tell us of a man who, through a misconception, or mistake, fell into a dream, was deceived by evil, and had certain evil experiences, sin, disease, and death. This kind of man is always a dream man, and his whole experience is a dream experience. Instead of having dominion over all the earth, he seems to be dominated by that which is evil, wrong, and discordant. We readily admit that a dream is not part of our real experience, and that, no matter how terrifying our dream has been, it was never true. A dream that depicts events which seemed to have happened twenty years ago is no more true than one which portrays events of the present. A divine fact is always true, but a false belief is not true and never was true. The Bible declares, "When I awake, I am still with thee." As we awake out of the dream of evil, we cognize the eternal verity that we are in the realm of divine reality and have never been outside of it.

Righteous Dominion

As we understand God aright, as we discern our oneness as a child of God, we gain a clear and practical distinction between "dominion" and "domination." The word "dominion" means "sovereign or supreme authority;" the word "domination" "act of dominating, . . . arbitrary or insolent sway." God is infinite good, the one supreme governing, sovereign, and controlling power in the universe. He is the creator and governor of man. He gave man dominion over all the earth, but He never gave one individual dominion over another individual. This prerogative belongs to God. God's wisdom guides man; His love enfolds him; infinite Mind directs him. Jesus manifested spiritual dominion, and this helped his disciples to realize God's loving control and unerring direction. He showed them clearly what God would have them do, and he knew that God would guard and guide His own. What rich, grand, and glorious lives we would lead if we would adopt this attitude of our great Teacher and Way-shower. The Bible declares, "He shall direct thy paths," and our Leader has told us (Retrospection and Introspection, p. 90), "It is safe to leave with God the government of man." How quickly friction, discord, and inharmony would disappear from our lives, our homes, and all human relationships, were God's supreme control understood and lovingly applied at all times and under all circumstances!

Evil only False Belief

When I was a lad I lived in a section of the country where many good people believed firmly in the existence of ghosts. In our immediate neighborhood was an empty house which they thought was a place where ghosts held forth. Evening after evening a number of people would congregate in front of this house and watch the antics of the ghosts. Mysterious lights would appear and give forth strange illumination. Finally it was discovered that some practical joke had put some phosphorus on the walls, and that this was the cause of the mysterious lights. When this was found out, it was the end of the ghost business. Now what became of the ghosts? They never were! They only seemed to exist in human, material belief. They were never actualities, but falsities. What a helpful and healing truth we find in the Christian Science textbook (p. 353): "The true idea of being is spiritual and immortal, and from this it follows that whatever is laid off is the ghost, some unreal belief."

Expectancy of Good

Christian Science frees us and redeems us from any anxiety, apprehension, or dread of the future. God is infinite good, and He provides for His creation that which will bless, help, and protect His own. The sun can only give forth light; and God can only give good, for He has nothing else to give. In the Scriptures we read, "My expectation is from him," and again we read, "There shall be a reward, and thy expectation shall not be cut off." As we think truly and live nobly, we gain a greater expectancy of good, especially more of it, enjoy it in a greater measure. A traveler was once going through a mountainous country. One day when he was looking out of the car window, there appeared to be a beautiful lake in the clouds, and the tops of the peaks seemed like islands in the lake. The explanation was simple. The train had reached an altitude where one could secure this beautiful view, which could not possibly have been seen from a lower level. As we reach the altitude of high thinking we see a greater manifestation of good; it is constantly unfolded in a greater abundance. We then face the future with joyful and happy expectation, and not with gloomy foreboding. A knowledge of the oneness and alness of good puts our expectation on the side of health, not disease; harmony, not discord; abundance, not lack; good, not evil. Our textbook declares (p. 426), "Expectation speeds our progress." Our journey is upward and onward when we face Godward. If we ever look back, it should be only to see how far we have come. We have come a long way when we are grateful for the great good that is with us and before us, and do not think of the evil that we have left behind.

The Freedom of Divine Sonship

Our great Master, who was a free-man in the very highest sense of that term, whose entire ministry was in fulfillment of the Scriptural injunction to "let the oppressed go free" and that we "break every yoke," gave us the basis for divine liberty in that majestic declaration, "If the Son therefore shall make you free, ye shall be free indeed." You will recall that this sublime setting forth of man's true status was in answer to the Pharisees' boast about their material ancestry. Jesus saw clearly that a belief in man's material origin would only tend to bondage, and the limitations of the flesh. A recognition of man's divine origin would free mankind and annul the restrictions of the flesh. An understanding of man's divine sonship with God establishes his immortal status as a son of the Most High. God is Spirit, good, Soul, Truth, and Love. The man of God's creating must be spiritual, holy, and good. The child of Soul must be soulful, pure, noble, righteous, and perfect. The offspring of Truth must be truthful, harmonious, and honest.

The representative of Love must be lovely, healthy, joyous, and strong. We have heard a great deal lately about the candid camera. The word "candid" means "pure, clear, immaculate." God is infinite Love, the

only creator, the author of all that is real and eternal. As our thought is permeated with holy, spiritual love, we see God and His creation—the grand, the beautiful, and true. The camera of our thinking records the lovely, the true, the harmonious and fair.

Gratitude

St. John stated it thus: "We shall be like him; for we shall see him as he is," and our Leader has given us this priceless gem of Truth: "What is gratitude but a powerful *camera obscura*, a thing focusing light where love, memory and all within the human heart is present to manifest light" (The First Church of Christ, Scientist, and Miscellany, p. 164). As our thought is permeated with love and we are grateful for it, we see and record health, not disease; the pure, not the impure; the true, not the false; the real, not the unreal. This is healing in its very highest sense. The ordinary concept of healing is the restoring of bodily health, but this is a restricted concept of that term. "To heal" means "to restore to original purity and integrity." The Science of Love enables us to see man in his original purity and perfection, and then healing follows as surely as the dawn brings the light. Freedom then reigns; dominion is gained; the diseased and discordant disappear.

I knew a man who was afflicted with a painful disease for which, from a material standpoint, there was no cure. This disease involved a sense of irritation and inflammation. After he had become a student of Christian Science and had learned something of the effect of thought upon the body, he analyzed his thinking to ascertain the basic cause of his difficulty. He uncovered irritability, impatience, intolerance, criticism, resentment, bitterness, and misjudgment. When these false beliefs had been overcome by love, tolerance, kindness, compassion, and charitableness, the malady was overcome, and was gone forever.

How Healing Comes

In the Christian Science textbook we read (p. 208, 209): "Mind, not matter, is causation. A material body only expresses a material and mortal mind. . . . It is the mortal belief which makes the body discordant and diseased in proportion as ignorance, fear, or human will governs mortals." The human mind has made unceasing efforts to answer the age-long riddle, How does animate thinking affect inanimate matter? In Christian Science the answer is readily at hand, and is simple, logical, and convincing. The human body is a human concern, or the embodiment of human beliefs. No clear thinker believes that the human body is the immortal identity of man. He concedes that sometime it is going to be laid off. Eventually everyone will have to put on the old man with his deeds, and put on the new man, "which after God is created in righteousness and true holiness." How is this to be done? In another verse in the passage just quoted from the Bible, we are given the Christianly scientific process by means of which this

SOCIETY EVENTS

MRS. TURNPAUGH HONORED GUEST AT SHOWER

Mrs. Ernest Turnpaugh was guest of honor at a miscellaneous shower, given by Mrs. Earl Turnpaugh and daughters of Libertyville and Mrs. A. H. Pierstorff and daughter Margaret, Saturday evening, at the Pierstorff home. Fifty guests were present. Airplane bunco was the diversion of the evening. Prizes were awarded to Mrs. Gordon Wells, Mrs. Earl Turnpaugh and Mrs. Anna Nielsen. Decorations were carried out with apple blossoms and pink and blue favors. A delicious luncheon was served. Guests from a distance were Mr. and Mrs. Ira L. Beebe of East Chicago, Ind., and Mrs. Mary L. White of Maywood. Many lovely gifts were received.

Mrs. Turnpaugh (formerly Miss Ruth Pierstorff) returned to the home of her parents several weeks ago, from Ft. Lewis, Wash., when Sgt. Turnpaugh was transferred to the California desert for maneuvers.

FRIENDS HONOR CHARLES HOSTETTER ON BIRTHDAY

A number of friends and relatives called at the home of Mr. and Mrs. Charles Hostetter on North Avenue, Antioch, last Saturday on the occasion of Mr. Hostetter's birthday anniversary.

Some time was spent reading letters from his son, Charles, Jr., who is now in training at Camp Faragut, Idaho. Mrs. Hostetter served ice cream and cake, and real coffee to the guests. Mr. Hostetter was the recipient of many gifts and greeting cards.

Guests included Mr. and Mrs. Glenn C. Pfeifle and daughter, Elizabeth Ann, and Mrs. Charles H. Wilson, Oak Park; Oren Hostetter and family, Detroit; Miss Lena Hostetter and friend, Loretta Schmit, Waukegan; Mr. and Mrs. E. J. Flanagan and Mr. and Mrs. Bert Dickey.

LADIES' GUILD TO SPONSOR CARD PARTY

Members of the Ladies' Guild of St. Ignatius' Episcopal church will sponsor a public card party Tuesday, June 1, at 8 o'clock at the Guild hall, Bridge, 500, and bunco. Refreshments: Donation 35¢.

Mrs. Morris Radtke is chairman of arrangements.

O. E. S. CARD PARTY MONDAY, MAY 24

Members of the Order of the Eastern Star officers club will hold a public card party at the home of Mrs. Mollie Somerville Monday evening, May 24. Donation, 35¢. Contract and auction bridge, 500, pinocle and bunco. Refreshments.

Mr. and Mrs. Harold Durland and children, Louanne and Richard, having sold their home in Mt. Prospect, will spend the summer with Mrs. Durland's parents, Mr. and Mrs. George Eaton of Fairfield Farm. Mr. Durland is head of the Art department at the Blakley Printing company of Chicago.

AUXILIARY CARD PARTY WELL ATTENDED

The card party held by the American Legion Auxiliary Friday evening at the Legion hall was well attended. Bridge, 500 and pinocle were played. Prizes were awarded to Mrs. B. R. Burke, Mrs. E. Skiff, Mrs. P. Ferris, Mrs. O. H. Kaufman and Mrs. C. E. Hennings for highest bridge scores. Winners in 500 were Mrs. John Horan, Mrs. Frank Harden and Mrs. Earl James Hays. Pinocle winners were: Mrs. Don Heath, Mrs. Maude Johnson and Mrs. Robert Runyard. Mrs. O. S. Klass, Mrs. Lester Heath and Mrs. Thomas Burnett served on the committee. The sum of \$22.40 was cleared. The next meeting of the Auxiliary will be held at the home of Mrs. Alma Harden, the date to be announced later.

MRS. KEULMAN HOSTESS TO BRIDGE CLUB

Mrs. William Keulman, Jr., was hostess to her bridge club at her home Monday evening. Two tables were in play. Prizes were awarded to Mrs. Alvin Keulman, Mrs. George Keulman and Mrs. Spence Miller. A luncheon was served following the card games.

SIXTY ATTEND R. N. A. PARTY

Sixty persons attended the Royal Neighbor card party held Tuesday evening at the Guild hall. There was a prize for each table and several grand prizes awarded. Co-chairmen on the committee were Mrs. Arthur Edgar and Mrs. Simon Stowe.

Mrs. John Blackman, Jr., left Sunday for New London, Conn., where she will join her husband who is stationed there. Mr. and Mrs. Arthur Laursen and Mrs. Blackman were dinner guests of Mr. and Mrs. William Klevens in Chicago, Sunday.

C. L. Kutil attended a vocational agricultural meeting for Central Illinois schools, held at Plato Center, Monday evening. Plans were made for Future Farmer boys' fairs to be held in conjunction with the 4-H work. The fairs will be held at Aurora and Waunakee.

Mr. and Mrs. Robert Dunn of Aurora, Ill., were weekend guests of the former's sister, Miss Margaret Dunn.

Mrs. Robert Webb, Miss Adelle Miller and Mrs. Mollie Somerville spent Monday afternoon in Kenosha, Salem, Wednesday.

Illiini Ag School Soybean Work Proving Worth

Pioneering work by the University of Illinois College of Agriculture in the breeding, production, and utilization of soybeans paved the way for Illinois to become the premier state in the production of this crop and an "arsenal" of oil and other soybean products vital to war.

Without the University's pioneering which led to the establishment of the gigantic soybean industry, the nation would be sorely pressed to meet wartime needs in oil and certain other products. Because of the pioneering and because of high yielding strains developed by the University, Illinois produces more than twice as many soybeans as any other state and has the highest oil yield per acre in its beans. Illinois farmers last year realized about \$75,000,000 from their soybean crops.

So important are soybeans to war that the use of soybean oil for soap and other industrial products has been prohibited except for direct military use. Oil not used for direct military purposes is needed for food both in America and for lend-lease.

Among war uses of soybeans is the making of plastic helmets. Small arms are equipped with plastic grips made from soybeans. One soybean plastic with unusual resistance to heat and vibration may be useful for motor housings. Workers in noisy war factories wear plastic ear stoppers made from soybean materials.

Plywood made with soybean glue has a variety of uses, such as in torpedo boats, mine sweepers, cargo vessels, army landing boats, defense housing, skis, pipe, chemical vats, and shipping containers. Under production are airplanes with fuselages, wings, and stabilizers of plywood.

Soybeans can even be made into fiber cloth at half the cost of sheep's wool. If the armed forces should take all available wool, civilians may eventually find themselves clothed in soybean fiber. It is soft, warm, and resilient.

Mr. and Mrs. William Valters and Fred and Wallie Valters of Chicago were guests of friends in Antioch Saturday.

Mrs. Maynard Hogan and son, Jimmie, and Mrs. M. Hogan, Sr., of Woodstock called on friends in Antioch and visited with Mrs. Hogan's mother, Mrs. Andrew Nielsen, at Salem, Wednesday.

What You Buy With WAR BONDS

Wishful thinking will not halt Hitler's tyranny, nor will "spare-change" financing give us the money necessary to win this war. So start today investing in your country's War Bonds with ten percent or more of your earnings.

SYNOPSIS

CHAPTER I.—The story of their part in the battle for the Philippines is told in this the second chapter by four of the five naval officers who are all that is left of Motor Torpedo Boat Squadron 3. They are Lieut. John Bulkeley (now Lieutenant commander) squadron commander; Lieut. R. B. Kelly; and Ensigns Anthony Akers and George E. Cox Jr. (The fifth officer, Lieut. Henry J. Brantingham, has since arrived from Australia.) The squadron, hand picked by Bulkeley from volunteers, had come to the Philippines in the fall of 1941. They knew trouble was coming, but the events of December 7 were as much of a surprise to them as to anyone, because they thought the Philippines would be taken first.

Lieut. Kelly, second-in-command, to whom Bulkeley delegated the task of telling most of the story, describes his preparations for war. Hearing about secret operations orders, he went to the Officers' Club in Manila on the eve of Pearl Harbor and had a thick steak with all the trimmings. After receiving his orders from Bulkeley the next afternoon, he took three of the boats to Mariveles on Bataan, where they were to report to the submarine tender for provisions and fuel. When they got there they found the tender had been ordered away. So they set up makeshift headquarters in native huts at Sismain Cove.

CHAPTER II.—Lieut. Kelly continues: Refueling the boats from drums was a dangerous job. They found water and rust in the gas, but didn't know then that the gas had been sabotaged. Kelly had a badly gashed finger, but couldn't take time to go to the hospital. Lieut. Bulkeley describes the first big air raid.

CHAPTER III.—Lieut. Kelly tells how he was sent to a tunnel hospital on Corregidor, where he met Peggy, a nurse. Survivors from the sinking of a shipload of refugees were brought to the hospital. Patients from Manila were also moved into the tunnel, and Kelly learned from them how badly the war was going.

CHAPTER IV.—A member of a tank crew trapped by the Japs concludes his story of their escape as told to Lieut. Kelly in the tunnel hospital on Corregidor. Kelly tells of the heroism of the hospital staff, and especially of the nurse, Peggy, during a severe bombing. Ensign Akers tells some of his experiences just before Manila fell.

CHAPTER V.—Ensign Akers continues, and Ensign Cox adds his story of the fall of Manila. The PT boats pulled away safely from the blazing city. Lieut. Kelly tells how he spent New Year's Eve in the hospital, while Lieut. Bulkeley discussed with the Admiral a plan of escape to China. Bulkeley tells how two of the boats, the 31 and the 34, went out into Subic Bay on a night raid.

CHAPTER VI.—Lieut. Bulkeley continues: When the 31 boat didn't show up, Bulkeley, in the 34 boat, sneaked up to torpedo a cruiser. Later they learned what happened to the 31 boat. When the sabotaged gas clogged the engines they drifted and landed on a reef. All but two of the men from the 31 crew finally returned. Lieut. Kelly persuaded the order to let him out of the hospital and went out on patrol. They broke up a Jap landing party, then captured a landing barge.

CHAPTER VII.—Lieut. Kelly continues: They captured a Jap captain and one of his men. Meanwhile the Japs, tired of being heckled by PT boats, sacrificed another ship as bait. But two of the original six torpedo boats had also been lost so far.

CHAPTER VIII.—The torpedo boats took their final crack at the Japs off Batangas by sinking a 10,000-ton ship. March first General MacArthur surprised the Japs by taking a ride in one of the boats. When he returned he presented Bulkeley with the order decorating him with the D.S.C. But everyone knew something was up. Lieut. Kelly talked with Peggy, the nice little nurse on Corregidor.

CHAPTER IX.—Lieut. Kelly tells how he tried to let Peggy know he might be ordered away without actually telling her anything. On March 11, Kelly continues, Lieut. Bulkeley showed them all their secret orders. They were to carry General MacArthur, his wife and son, and some additional personnel to the southern islands. They left that night. Lieut. Kelly's boat ran into trouble and nearly missed the others.

CHAPTER X.—Lieut. Kelly continues: The boats continued the trip to the southern islands where General MacArthur's party would be met by a plane.

CHAPTER XI.—Lieut. Kelly continues: When they arrived at their destination, Cebu, General MacArthur promised Lieut. Bulkeley that if it was humanly possible he would get the officers and key men of Squadron 3 out of the Philippines. While Kelly was busy getting his boat repaired, Lieut. Bulkeley was helping President Quezon escape.

CHAPTER XII.—Hearing of a great offensive planned against the Japs, Squadron 3 wanted to take part. They did plenty of damage before Lieut. Kelly's boat and the one Lieut. Bulkeley was riding in were forced into hiding after firing the last of their torpedoes.

CHAPTER XIII

"They didn't get us then," said Kelly. "At midnight our escape began. The destroyer lost me with its light temporarily, so I did a ninety-degree turn so as to pass astern of her and lose her. I continued on that course five minutes, heading directly away from her, then to the left in another ninety-degree turn, and I started looking around the ship."

"I found Reynolds, my port gunner (he was also cook), had been shot through the throat and shoulder. I got him down below and had the chief torpedoman and the radioman give him first aid."

"I found our mast had been shot off a foot over my head, so we couldn't use our radio for sending. The port turret had been hit and its guns were out of action."

Lieutenant Kelly continued his dramatic story:

"Our objective now was to get Reynolds to a doctor. We were go-

ing like a bat out of hell. I couldn't see the 41 boat—it was so dark I couldn't even see the shore. I just had to look at the compass and make mental estimates as to how far we had gone in various directions since I last had seen land I recognized, and then guess where we now were. I thought we were near the narrow channel between the islands; would another Jap destroyer be laying for me there?"

"Suddenly, directly ahead, a searchlight came on, less than a mile away—a Jap steaming full speed at me. I barely had time to give a hard left and a hard right and we went scooting past each other at a relative speed of sixty knots before he had a chance to fire a shot. He turned, holding me down with his light like a bug under a pin, and started chasing, blazing away with big guns—two splashes four hundred feet away, two more fifty feet away. I started zig-zagging to squirm out of that light—wouldn't let my gunners fire a shot; it would help him keep our position. I was getting away, all right, but he kept firing for ten minutes, although his accuracy was going to hell. By 1:30 I could barely see his light, which was waving around, searching the water back of us."

"I kept on, wide-open, wondering how we'd ever get in, since we had no charts, it was black as pitch, and I knew coral reefs must be all around us. At four o'clock I slowed down and headed into where I hoped the beach was, taking soundings. The water suddenly shoaled off and bump! we were aground—a pinnacle of coral under her belly. Looking down with flashlights we could see the water was twenty feet deep with coral pinnacles all around us about every twenty feet, like a petrified forest, rising to within five feet of the surface."

"Studying the shore line, I realized we were about ten miles too far up the coast. I sent Ensign Richardson ashore in a rowboat to send an army doctor and ambulance out from Cebu for Reynolds, and also a tug for us."

"For the next hour we salied ship-rocking it, trying to joggle it off the pinnacle, backing with the engines—and finally managed to roll it off. We backed carefully out of that petrified submarine forest—it was five o'clock now—and started looking for the channel entrance. Since we had no charts, it had to be guesswork and guessing had proved dangerous, so I decided to lay to out there in the open sea, waiting for dawn."

"And why not? Didn't we have air superiority now? I hoped with luck that maybe we'd see some of the big squadrons which had roared up from Australia during the night, and would spend the day pounding Jap shipping and warcraft. Well, they needn't bother about the cruiser—we'd attended to her."

"Reynolds was feeling fine now. I'd suddenly remembered a little present Peggy had given me on the Rock, went down to my locker and brought it up for him—a couple of codein tablets and a sedative pill. Now he was sitting topside smoking, although he couldn't drink because the water would leak out the hole in his throat. They'd been short of drugs on the Rock, but she sneaked these out for me just in case I got wounded out on patrol. A hell of a thoughtful present, and much more valuable and useful than a gold cigarette case."

"Well, tonight we'd helped pay her back. The cruiser was out of the way, the planes would be here any minute, to put the destroyers on the run. Presently the seven fat little intercoastal steamers, loaded deep with supplies, would be waddling up the coast so Bataan could hold on. It looked like a good war now."

"Of course our torpedoes were all gone and you could technically say we were expended. But we had plenty of fight left, and if the tide of war had really turned, there would be more torpedoes and gasoline."

"Dawn came with a low fog which shut out the coastal contours, and because of all the coral we had to stand well off the coast. The sun was well up but that didn't worry me; with air superiority we didn't need to stalk in the dark any more."

"By 7:30 the sun had burned the fog away and we started out on two engines—one screw had banged up on the coral but that didn't matter—we were crippled now, but 'Dad' Cleland would quickly fix us. At eight o'clock we spotted the entrance to the long channel and turned in."

"So there we were, fat, dumb, and happy, heading up the narrow channel at fifteen knots, when all of a sudden—Wham! It was a hundred-pound bomb which landed about ten feet off our bow. It blew a hole into the crew's washroom you could walk through. It tore the port machine gun off its stand. It blew all the windshields in—and covered us with water and mud."

"What did I think? Well, I remembered what I said. Before even I looked up, I yelled, 'Those crazy bastards, don't they know we're on their side?'

said, 'there didn't seem to be anything for me to do, so I went below and lay down on Mr. Brantingham's bunk. They hit me in the belly while I was lying there. I'm done for, sir. I'll be all right here. You get out the others.'

"Well, the hell with that. So in spite of his protests, Martino and I carried him ashore. Then we went back for a last trip. Only Harris was left, lying where he had tumbled into the tank compartment. But the radioman and I carried his body ashore, because we hoped to give him a decent burial."

After reaching shore at Cebu Island, Lieutenant Kelly turned his attention to his casualties.

"I rounded up some native soldiers, who got stretchers, and in these we carried the wounded to the other side of the island where they could be loaded into a launch, putting them in charge of Sheppard, first-class machinist's mate, to get them to the hospital."

"At this point a banca showed up, and it was a native doctor, the one we had sent Ensign Richardson ashore for, before dawn, for Reynolds, who by now was en route to the hospital. So I loaded the ship's papers, binoculars, and stuff into this banca, and with them I shoved off for Cebu."

"Halfway over the three planes came back and we tried to hide behind a fish trap—a net with bamboo poles sticking up out of the water. But they weren't strafing now. They were looking for the fourth plane we'd shot down. They scoured the area for twenty minutes. After they left we went on in, and of course I went straight to army headquarters, and met the colonel in charge—the No. 2 officer of the island. No, he hadn't heard from Bulkeley, but he'd send out a radio message to hunt for him if he was still alive. And maybe I'd better give my report direct to the general. I wanted to, and also I wanted to find out what had happened to our big American Offensive we had been asked to be part of, and that air umbrella which should have protected us this morning."

"The general had been having a conference at the bar of the American Club, sitting with some other officers and some civilians who were now all having a drink. Now a general is pretty important, and you don't just go barging into his conferences—not if you're a mere naval lieutenant in command of a little seventy-foot boat. So, following the lead of this conducting colonel, we stood off a bit and waited until the general gave us the signal to come on in and tie up at his table. He saw us all right, but he didn't give us the signal—just went on talking to the other officers and civilians."

"Now, thinking back, I realize it was a most important conference. But at the time I was excited, because I had just come from my boat in which I'd fought all through the war and with which we'd just helped to sink a Jap cruiser—my boat which was now lying beached across the bay, with one man dead, another dying, and all the rest but three wounded. I suppose I was unstrung. I wanted to have him make my report by radio about the cruiser. And then, although maybe it wasn't my business, I'd have liked to find out about that American offensive he'd invited us to join the night before."

"We kept standing there, the two of us, while I got madder and madder. I see now it was unreasonable, but I couldn't help it then. Finally it embarrassed even the colonel and he invited me to step over by the bar and have a drink with him. I said no, thanks, I had work to do, but I'd have a Coca Cola. I stuck around ten more minutes drinking it and then, since the general gave us no signal, I shoved off.

"I arranged to have the boat guarded. Because I wouldn't yet admit that maybe both it and we were expended now. High tide was at four o'clock. Couldn't we maybe get her up, float her over to 'Dad' Cleland's, get torpedoes and a crew from somewhere, and maybe fight her just once again?"

"I went over there to where Brantingham and the 35 boat were, taking the stuff I'd salvaged from the boat, and they gave me some lunch as I talked about the fight and what had happened to us, and during it Ensign Richardson telephoned. He said Reynolds had died, and they were burying him and Harris in the American cemetery with a military escort and a priest, at four o'clock. I said of course I would go, and would meet Richardson at the bar of the American Club, from which we'd go over together."

"I got there but Richardson didn't show up. I stood around. I was tired and mad and lonesome as hell. Finally a civilian came up—and I got to talking to him. He was a very nice guy—vice president of the club. I told him our story and he said how sorry he was, and asked if he might go to the funeral. He was the first sympathetic person I'd met."

"Presently a truck arrived, driven by a Filipino soldier with a message for me that the funeral had been postponed until ten o'clock tomorrow. This American found out I knew nobody in Cebu, hadn't slept, and had no place to go, so he invited me out to his house for dinner and the night. Before I went, I located our three men who were unwounded. I gave them fifty pesos and told them to go ashore and get drunk and forget the whole mess—if they could."

"But meanwhile Ross had shot down one of the four planes."

(TO BE CONTINUED)

LAKE VILLA

Lake Villa Community Church
Methodist—W. A. MacArthur, Pastor
Sunday School—10:00 A. M.
Worship Service—11:00 A. M.

The Official Board of the church will meet at the parsonage on Wednesday evening, May 26, for the final meeting before Conference and also before the Rev. and Mrs. MacArthur and family leave for the west where he will be in his own Conference, and also have a charge.

On Friday evening, May 28, an informal pot luck supper will be held at the church dining room and a program, in which Rev. MacArthur will give a chalk talk, will follow. Everyone is welcome. Just bring something for the supper and enjoy the evening with your friends.

Mr. and Mrs. Ira V. Bailey came here several weeks ago from Cleveland, Ohio, and have been with Mrs. Bailey's parents, Mr. and Mrs. Carl Seeger, at the Willett estate on Fox Lake, have purchased a home in Kenosha where Mr. Bailey is employed, and moved there the first of the week. Their daughter, Constance, has been attending Cedar Lake school.

The first floor of the Hamlin building on Cedar avenue is being remodeled and made into living rooms. Mrs. Harriet Ballenger visited relatives and friends in Chicago over Saturday and Sunday when she had a few days leave from her duties in the Postal division of Great Lakes Training Station.

Mrs. Jake Fish and her mother, Mrs. Sheridan Burnett of Antioch were Kenosha visitors last Friday.

Mr. and Mrs. Neil Reidel attended the wedding of Mrs. Reidel's brother in Chicago on Sunday.

Mrs. Leonard Schneider and small daughter, accompanied by her sister, Mrs. William Snyder and son, also Mrs. William Snyder, Sr., of Libertyville, started Monday for Kansas, where Mrs. Schneider will visit her husband at Fort Riley and her sister and Mrs. Snyder, Sr., will visit relatives near there.

Mr. and Mrs. Clarence Blumenschein went to South Bend, Ind., last Saturday and remained until Sunday evening with their son, Gordon Blumenschein and family. Mr. and Mrs. Blumenschein were guests of Mr. and Mrs. George Magdon in Waukegan on Thursday evening and their home here.

Mrs. Howard Dibble is now employed at the Public Service Co. office at Lake Villa, since her husband's entrance in the army.

Mr. and Mrs. Clayton Hamlin, with a party of friends, enjoyed an outing in northern Wisconsin from Friday until Monday.

Mrs. Fred Hamlin and Mrs. Neil Reidel were Waukegan visitors last Friday.

Cheif Petty Officer Eugene Anderson and wife, the former Betty Reinbach, who have been in Philadelphia for some time, came this week for a visit with the home folks. Mrs. Anderson will remain with her parents indefinitely while her husband is transferred to Boston for further training in the Coast Guards.

Sharon Ann, young daughter of Mr. and Mrs. Edward Langbein, was baptized at the morning service at the Community church last Sunday.

MILLBURN

MILLBURN MAIDENS

The Millburn Maidens 4-H Club met at Mrs. Cunningham's home Saturday afternoon for their first regular meeting of the year. The lesson was the preparation of a pudding. Plans were made for future meetings.

On Wednesday, June 2, the club will meet at the home of Betty Miller, who will demonstrate the preparation of a milk drink.

Lt. Marc Edwards who has a ten-day stop-over in transit from LaGuardia Air Field, N. Y., to Alpena, Mich., spent the weekend with his mother, Mrs. E. H. Edwards.

Edward and Patsy Dickey of River Forest visited at the D. B. Webb home from Friday until Monday.

Memorial Day services will be held at Millburn cemetery Sunday afternoon, May 30, with Richard Martin in charge of the program.

Miss Ruth Minto and her eighth grade class from Howe school spent Saturday in Chicago at the Field Museum and other places of interest.

Mrs. Harley Clark and daughters, Mrs. Walter Fontaine and Miss Thelma Clark attended a shower for Mrs. Ernest Turnbaugh at the Pierstorff home Saturday afternoon.

Mr. and Mrs. George DeHaan of Waukegan, Lieut. Henry Randall of Midland, Texas, and Mr. and Mrs. Donald Truax were supper guests at the home of Mrs. Ida Truax Sunday.

Hickory unit of Home Bureau will meet at the home of Mrs. James Cunningham Friday afternoon with the major lesson on canning fruits and vegetables to be given by Miss Vivien Bonner.

Mr. and Mrs. Vernon Wells and granddaughter, Vickie Beeman of Libertyville spent Wednesday evening with Mrs. Ida Truax.

The Rev. and Mrs. L. H. Messer-Smith were supper guests at the Kenneth Denman home Saturday evening.

Mr. and Mrs. Victor Strang attended the ordination services for their son, Glenn Strang held in the Presbyterian church in Waukegan Tuesday evening. Mr. Strang has ac-

cepted a call to a church in Green Valley, Ill.

Private Raymond Hauser left Sunday evening for Las Vegas, Nev., after a fifteen day furlough with his parents, Mr. and Mrs. Frank Hauser.

The Rev. and Mrs. L. H. Messer-Smith with a group of young people attended church services at the Chapel Street Christian church in Waukegan Sunday evening.

FOR SALE

Homelawn grass seed 29c lb.; 5-lb. lots 26c per lb. All tested seed. Reeves Walgreen Agency. (39tf)

TRIMZ—Ready pasted wallpaper. See us before you decorate. Reeves Walgreen Agency. (39tf.)

Keep your home in good condition. That's more important than ever now. For estimates on best materials see Antioch Lumber & Coal Co. You can depend on top quality. (39tf)

FOR SALE—Reg. 2 yr. old Jersey bull; also 5 yr. old pony, saddle, bridle and harness. Frederick Bushing, Salem, Wis. Tel. Bristol 33R1-2. (41p)

FOR SALE—3 barrows, wt. about 70 lbs. each. Lloyd Miller, Pollocks road, 1 mile west of Rt. 45, north of Millburn. Tel. Antioch 466-W-1. (41p)

FOR SALE—Lawn mower, sail boat masts, furniture, oil stove, pumps, small truck, pump, jack, windows, doors, ovens, electric ventilating fan. Dr. Corbin, Cross Lake. (41)

FOR SALE—1936 Plymouth coach, good condition throughout. 330 Depot St., Antioch, Ill. (41p)

FOR SALE—New Ladies' and Men's bicycle equipped with balloon tires and basket carriers. Phone 158-M-1. (41p)

FOR SALE—Piano, cheap. Tel. Antioch 226-M-2. (41c)

FOR SALE—A large wall ice box, 200-lb. capacity, and a Coca-Cola box, very cheap. Tel. Antioch 370. (41-44p)

FOR SALE—Table top gasoline range; upright piano and bench. Tel. 273-R-1. (41c)

FOR SALE—9 piece walnut dining room set in very good condition. Mrs. Weise, Petite Lake Highlands, Tel. Lake Villa 3217. (41-42p)

FOR SALE—Scandalli (Italian make) accordion, 96 bass, 2 shifts. Tel. Antioch 173-M. (41p)

FOR SALE—20 ft. of silage in a 14 ft. silo. Russell Horton, Tel. Bristol 3-R-12. (41p)

FOR SALE—Marglobe and Rutgers tomato plants and sweet pepper plants. Located on Horton road, third farm east of Rte. 45. H. Flood. (41p)

FOR SALE—Seed potatoes. Alfred Pedersen, tel. Antioch 167-W-1. (41e)

FOR SALE—Excellent brood sow, red. Tom Harness, one mile south of Rt. 173 on Rt. 45. Call evenings. (41c)

FOR SALE—White Pekins duck eggs for hatching. J. P. Miller, 757 Main St., Antioch. Tel. 222-J. (41p)

FOR SALE—50-ft. 2x4's; 300 sq. ft. of 4-in. flooring. M. C. Nixon, Rt. 173. (41p)

FOR SALE—Large size light green reed baby buggy; a combination stroller and walker; a nursery chair, and a child's rocking chair. All in excellent condition. Mrs. Sylvester Holz, 3 miles north of Brass Ball corners. Tel. Wheatland 9-1. (41p)

FOR SALE—Pure bred Holstein sire, two years old. Clarence White, State Line road. Tel. 226-R-2. (41p)

FOR SALE—5 room furnished home and garage on Hwy. 59; fruit trees, large garden; 100x200. Priced \$3000—\$500 down, 5% int., balance like rent. S. B. Nelson, 881 Main St., tel. 23, Antioch, Ill. (41e)

FOR SALE—5 room cottage, elec. good location, 1 mile north, for cash. S1250. S. B. Nelson, 881 Main St., Tel. 23, Antioch, Ill. (41c)

for Rent

FOR RENT—Store building at 924 Main street. Telephone 177-W. Mrs. C. N. Lux, Antioch, Ill. (40f)

FOR RENT—6 room bungalow, furnace heat, free electricity, water and garden, \$40 per month, by the year. Lynn, Lake Villa 2836. (41t)

FOR RENT—House at the corner of Deep Lake rd. and Millburn rd., near Oakland school. Tel. Antioch 185-M-1. (41c)

FOR RENT—Furnished 5 room and bath year round cottage in Shady Nook. Apply Cox's Corners, Chancery Lake. (39ctf)

FOR RENT—Three room apartment and bath by June 1st, furnished. Adults only. 505 N. Main St., Tel. 433-R. (41c)

FOR RENT—Three room apt., furn. for adults, \$25.00 per mo., in town. Also many cottages. S. B. Nelson, 881 Main st., Tel. 23, Antioch, Ill. (41c)

Bicycle Tires Over Chain Tugs
To make chain tugs easy on the sides of horses, put the tugs through old bicycle tires so there is rubber covering all the way from the hames to the cockeyes.

Tobacco Like Trees
Tobacco plants as tall as trees, some of them reaching a height of 60 feet, have recently been found in the Andes mountains of South America.

Jalopies Destroyed
Conversion of jalopies to scrap throughout the country is at a rate exceeding auto production in 1929, a banner year for new cars.

Fruit and Nut Breads Slice Easily
Make your fruit and nut breads at least a day before you plan to use them. They are easier to slice after storing for 24 hours.

WANTED

WANTED—Girl for year around work in store. Write Box AH, care Antioch News. (41e)

WANTED—Women and girls to make surgical dressings at Antioch Red Cross rooms in Webb building over Holbek's 5 and 10c store. Volunteers are needed. Hours are: Tuesday, 9 to 4, and 7 to 9; Thursday, 12 to 4, and 7 to 9; and Friday, 12 to 4.

MAIDS WANTED—General work. Salary and full maintenance. Apply in person before 4 p. m. Lake County General Hospital, Waukegan, Ill. (39-41c)

WANTED TO BUY—Baby walker. Tel. Grayslake 7682. (41p)

WANTED—Good outboard motor; prefer Johnson or Evinrude, other makes considered; 2½ to 6 h. p. Call Ontario 7052, or write Don McAndrews, 1619 Circle Ct., Waukegan, Ill. (41p)

HELP WANTED—Young girl or middle aged woman for waitress position in private family. Only character references necessary. Write to Box 150, Lake Forest, Illinois. (41c)

WANTED—Man for farm work, either single or married. Tel. Wilmot 267, J. N. Blackman, Antioch, Ill. (41p)

WANTED TO BUY—Used oil burner, to heat 3 or 4 rooms, and a small drum for oil. Tel. 237-R-2 after 7 o'clock. Will pay cash. (41c)

THE ANTIQUE NEWS, ANTIQUE, ILLINOIS

FAT SALVAGE DRIVE STARTS IN ANTIQUE

Chairman C. L. Kutil Urges Thorough Campaign in Township

An adequate supply of fats and oils is essential to winning a war. That is the statement of Chairman C. L. Kutil of the Antioch Township Salvage committee. The local campaign is now on.

"The Allied blockade, which shut off Germany's imports of fats and oils, was a major factor in her being defeated in World War I," Kutil said.

Memo to President:

Drew Pearson in "Merry-Go-Round," Chicago Herald and Examiner)

"Memo to the President: The anti-tank troops you saw at Dallas, Texas, on your recent trip to Mexico were not from the 8th Service Command, as was represented to you. They were from Camp Hood at Temple, Texas.

"What happened was that the 8th Service Command at Dallas wanted to make the biggest and best possible showing for you, but had no big anti-tank guns, or bazookas. So they sent to Camp Hood for a company of bazooka men."

"When the latter arrived, very proud to appear before the President, and wearing their insignia of a leopard biting a tank, they were made to remove these insignia before they paraded before you."

"Well! With such goings on how may the press be expected to make a factual report to the nation?"

The Antioch News has invited business and professional firms of the lakes area to participate as co-sponsors in newspaper advertising in support of the government's many vital war-time drives. These drives include War Bond sales, scrap metal salvage, civilian defense, rubber salvage, safety campaigns, recruiting for army, navy, marines, WAVES, WAACs, SPARS, Red Cross, USO, rationing, and many other activities, all concerned with the early winning of the war. Many local firms and individuals have already responded, expressing their willingness to co-operate.

The Antioch News believes, as does every other reputable business concern, that there is only one right way of doing business—and that is on the square. . . . The News never has used a firm name or an individual's name as sponsor of any advertising without first obtaining authority to do so. The price was agreed upon before the advertising appeared. Readers may know for a certainty that names appearing as sponsors of any advertising in the News are genuine—their names are there by reason of consent because they wish to co-operate and are willing to share their part of the expense of the advertising, whether it be in support of the various war activities or other community enterprise. During the current advertising the sponsors may be regarded as those who are directly behind the war effort on the home front. . . . Although the News has donated almost \$2,600 in space in the interest of various war-time drives, a record of which it is proud, but nevertheless carrying on with the work on the home front is not a one-man job, or a one-industry job—it is a united community job.

A&P URGES USE OF RATION STAMPS EARLY NEXT WEEK

Antioch consumers are urged by Earle Gibbs, manager of the A & P store here, to cash their ration stamps early next week to avoid a more than usual buying rush expected on the weekend.

A combination of pre-holiday food purchasing and the fact that all food ration stamps now valid expire on the Memorial Day weekend probably will result in unusually heavy purchasing on Friday and Saturday unless more consumers do their shopping earlier. Never before in the rationing program have all stamps expired on a weekend. Mr. Gibbs pointed out.

The expiration date for coffee stamp No. 23 is May 30; for sugar stamp No. 12, May 31; blue stamps G, II, and J expire May 31 as do red stamps E, F, G, II, and J.

"Stores are likely to be less crowded on Monday through Thursday than on Friday and Saturday," he said. "The shoppers who come in early in the week will be able to select rationed items and total up their points more readily. They will find a complete line of merchandise from which to select their purchases. Also they will experience a minimum of delay in getting their purchases checked."

Shoes Polished With Flowers
A vegetable found growing in New South Wales is used as a substitute for shoe blacking, four or five flowers being required to polish each shoe.

Turkey Gets Iron, Steel
Most of the iron and steel produced by a new plant in Turkey goes to the government.

UPHOLSTERING
Wood that has been split, seasons twice as fast as round wood which is more than six inches in diameter.

\$1,096,220.67 \$911,350.00

May quotas have been arranged by towns and cities to conform to sales reported by the Federal Reserve bank and Great Lakes. These figures include total sales expected from the townships in which these towns are located.

Expert Riflemen

U. S. marines are famous as highly skilled experts with rifles and pistols.

Prof. J. R. Fellows firing the "Furnace of the Future" developed at the University of Illinois. It burns soft coal without producing smoke, and gets 25 per cent more heat from the fuel.

Burn Soft Coal Without Smoke In U. of I. Devise

Furnace of Future Developed; Gets 25% More Heat From Fuel.

The home furnace of the future has been developed at the University of Illinois and is now being given final tests there. It is being put through its paces by J. R. Fellows and J. C. Miles, the two University engineers who devised it.

The furnace has built into it the first major improvement in hand-fired fuel burning for home heating since Benjamin Franklin invented the stove in 1740. That improvement is the "down-draft coking principle" devised by Professor Fellows.

With it the cheapest soft coal can be burned without producing smoke and produce 25 per cent more heat from the fuel because the smoke is burned. And because cheap soft coal can be burned smokelessly, many homeowners who are using more expensive fuels may cut their heating bills in half.

The principle also is incorporated in a simple device which can be inserted in almost any present furnace to make it a smokeless, and 25 per cent more efficient, burner of soft coal. This device is called by Fellows a "conversion unit."

Alloys for the conversion unit are not available until the war ends, when it is expected to sell at from \$50 to \$75. It will pay for itself in fuel savings in two or three years, at the same time providing cleaner and more even heat.

The two developments may make cities and villages free of smoke, cut home heating costs, and reopen markets for Illinois soft coal.

They have no moving parts and consume no electric current. The conversion unit can be installed into the firing neck of almost any present furnace in 10 minutes without even putting out the fire.

The furnace of the future not only is smokeless, but incorporates a number of other new ideas, and more may be added. It has square corners and is slimmed down to the general sleek lines of a refrigerator.

Shovel and furnace have been separated. Coal is inserted quickly and cleanly by the bucketful through a conveniently slanted door. Ashes fall into a removable pan which can be handled without raising a cloud of dust.

The furnace will go into production this summer and be available to replace present furnaces which are beyond repair, for war-approved housing, etc
